

MCR Safety COVID-19 Updates

April 3, 2020

As you are aware, our Nation is currently facing many challenges related to the health and well-being of every citizen. MCR Safety plays a vital role in this situation due to the demand of Personal Protection Equipment which provides key protection against COVID-19.

The severe spike in demand has caused a chain reaction that affects our global supply chain. Communications from our manufacturing facilities as well as other partners, warrants that we prepare you for a pending changes relative to the products which are in extreme high demand.

Raw material shortages, labor shortages, temporary governmental mandated factory closures, limited availability of air carriers (resulting in drastically higher airfreight costs) are some of the key drivers. We are working very hard to minimize any cost increases, but the need to urgently get additional stock to meet the needs of the industries in critical situations require us to air freight product on a regular basis, and shortages in production availability are driving cost up. Furthermore, this could affect current backorders in our system. Once we stabilize the supply chain and return to traditional, less costly ocean freight, we will adjust accordingly.

In the coming days we will announce the specific adjustments across each product line. Here is a snapshot of the products affected:

Disposable Nitrile, Latex, Vinyl, and Bi-Polymer Gloves

Headgear

Face Shields

Goggles

Select Styles Safety Glasses

Additionally, returns will not be accepted for these high demand items. If you have questions or concerns, please contact your MCR Safety Sales Team at 800-955-6887. Thank you for your continued support and, most importantly, stay safe!
